## Narcissistic Abuse Recovery Group

Emotional predators target people with high degrees of empathy, ambition, loyalty, and trust. These well-researched “super traits” are invaluable in relationships with decent people but extreme liabilities in relationships with perpetrators.

Feeling confused, beaten down, dominated, exhausted, or exploited by a partner, parent, or someone close to you, our group will cover:

- The contrast between public persona and coercive control in private
- Love bombing, idealization, future faking, devaluation, and hoovering
- How intermittent reinforcement & breadcrumbing make leaving hard
- Navigating the escalating abuse when you see “behind their masks” and/or leave
- How to understand, disengage, and recover from a trauma bond
- Surviving and thriving after your heart and soul have been shattered

- Wednesdays, 11:30-12:30 PM
- Meets Virtually
- \$125/session
- Discounts for prepayment
- Reimbursable out-of-network
- Reach out if time doesn't work
